

Electron Microscopy Department

1- Electron Microscope in the Visualization of Nanoparticles

The course focuses on the EM techniques and how to examine the nanoparticles by EM

Duration: 6 days

Fees: 900EGP for Egyptians /900US \$ for non Egyptians

2- Immunoelectron Labeling in Research and Diagnosis

The course explains the technique of immunoelectron microscopy and its role in evaluation of infectious diseases

Duration: 6 days

Fees: 900EGP for Egyptians /600US \$ for non Egyptians

3- Electron Microscopy in Early Diagnosis of Disease

The course focuses on the techniques and personnel experience of the department in research using EM. Also, it highlights the value of EM in the detection of cellular changes for early diagnosis of diseases.

Duration: 6 days

Fees: 900EGP for Egyptians /600US \$ for non-Egyptians

4- Electron Microscopy and Parasitic Diseases

The course focuses on the techniques and the study of parasites using EM

Duration: 6 days

Fees: 900EGP for Egyptians /600US \$ for non-Egyptians

5- Examination of viruses by electron microscope

Duration: 6 days

Fees: 900 EGP for Egyptians /600 US \$ for non-Egyptians
